- **Q-**How do I see my player's image? I can't find my player?
- **A-**This is a proofless process, meaning there are no images, poses or backgrounds to choose from. There will be a demo displayed at the photoday, and on the order page to show you what the theme will look like.
- **Q-** How do I know I will like my player's smile? What if my player's eyes are closed? I don't want to spend if I don't like the images.
- **A-** We photograph a handful of images for each player, giving us a selection to ensure eyes are open, and smiles are genuine (if they choose) We invite parents and guardians alike to take in the photoday session to approve the smiles, etc. Images are available onsite to review for those that still doubt our process. Please don't message us after the shoot looking for your images. The request will be ignored.

Remember, there is no requirement to order.

If you don't trust the process, we understand.

Know we wouldn't want to give an image that doesn't showcase your favourite player...

Of course, for those that do trust us, we thank you!
